1. Barcode-reader reads the code of a train, it shows the powerpoint of this country After reading this the code is blocked until it all codes have be read 2. Big powerpoint which goes on by clicking with the mouse with the wheels of the train 3. A small block on the first lock, when this one hits something the powerpoint goes on. Mouse inside the tracks; 4. Train stops at a specific position for each country, shows the powerpoint, then drives to the next one. Put a microchip in the train and program to stop at positions. Stops at a railway stations, spotlight the wagon, shows the powerpoint. The powerpoint shows statistics, music , inhabitans, famous sights, two page each country, needs: the speed of the train
