<b>Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance</b>	<b>Responsible school(s) or person(s) incl. deadlines</b>
<p>The Members of Croatia showed us their Control System and how it works:            → There was still a problem with the start of the presentation on the notebook. Everything else worked pretty well.</p> <p>We also tested the system which will power the upper parts of the waggons.</p> <p>We decided to talk and work from that point strongly together with the Control System group of workline C because of the overlapping work.            → We worked together on Saturday and have tested the control system that day</p> <p>We will post a drawing on how the two wires we have to get from will be connected and what exactly we need from you!</p>	All Members
