	[PT]

Minute written by	[LU] Michel Gieres
--------------------------	--------------------

Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance	Responsible school(s) or person(s) incl. deadlines
<p>[NO] asks whether anyone has brought any segments. Slovenia: 5 bent and 1 straight segment Germany: 1 straight and 5 bent segments</p> <p>[NO] unable to produce tracks due to teachers' strike</p> <p>The connector has to be changed.</p> <p>[NO] presents drawings for crossings. [PT] has produced the crossing but it seems it is not here in Finland. [DE] Wildgrube says he has seen a picture of the crossing, so he is sure that it is here. [NO] has brought materials to produce crossing.</p> <p>[DE] Wildgrube points out that on each track segment and working piece there has to be the country's [ID] so that after testing the tracks people can find their own parts.</p> <p>The crossing is connected to some track segments to see whether everything fits. Two wagons are connected and tested on some tracks including the crossing. Everything runs smoothly.</p> <p>It is agreed that [SL] and [LU] need to assemble the tracks at 9 a.m. The following morning.</p>

Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance	Responsible school(s) or person(s) incl. deadlines
<p>The threads in the tracks should be changed. The hole was too big. There were not enough threads (aluminium is too soft)</p> <p>Heli-coils must be used with an M5 thread.</p> <p>New drawings must be used. The heli-coils must be specified in the drawings.</p> <p>140 track segments are needed (only 60 have been produced so far). Are needed: 24 straight sections 116 bends 1 crossing</p> <p>Tracks from [SE] were milled on one side only. They need to be informed.</p> <p>The following schools make 10 straight segments each: [IE], [FI], [TK], [RO]</p> <p>All other schools make 6 bends The drawings and the STEP files will be made by [LU]</p>
