Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance	Responsible school(s) or person(s) incl. deadlines
<p>During the meeting in Austria we proceed to some tests in order to be sure that every partners could produce a wagon with a good "running smoothness".</p> <p>The tests proved that almost all the partners had done a good job... Actually each wagon had to be pulled with a force of 1 N max. Only one team produced an invalid wagon but we could easily spot the problem (bearing position).</p> <p>What the Belgium and French students did in BBS Bad Kreuznach is testing the invalid wagon again.</p> <p>This time the result was ok and then all the wagons were certified.</p> <p>Our job was complete and all the wagons passed the "running smoothness" test 😊 😊 😊</p>
