<b>Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance</b>	<b>Responsible school(s) or person(s) incl. deadlines</b>
<p>Proposals:</p> <ul style="list-style-type: none"> <li>• We should think about a touch panel with all the countries taking part in our project inserted. The shape, as the common resolutions state, must be like a puzzle.</li> <li>• Wagons should light up.</li> <li>• Discussion on advantages and/or disadvantages (time limited, maybe no much space to put everything on display).</li> <li>• Materials: choice among different solutions – wood, plexiglas, aluminium. Our group chooses plexiglas because it can be easily milled by CNC machines and for its flexibility and transparency.</li> <li>• Costs will depend on which material is going to be used and also on the electronic devices needed</li> <li>• A microchip</li> <li>• A transmitter connecting the map, the wagon and the video projector</li> </ul>
