Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance	Responsible school(s) or person(s) incl. deadlines
<p>1 checked the old agenda. 2 Discussed old ideas, barcode, infra red, colour sensor. 3 Ideas from the map, raised country's lighted borders. 4 talked about water cutting</p> <p>Proposal: cut out with water cutting, in Plexiglas. 12 mm thick. Than you made a steel plate with a offset from 3mm and place it in top of the Plexiglas plate. A hole with a LED in it for the capital city and the place of the school. LED's in the Plexiplate light up the borders.</p> <p>Detection system. We choose for the colour sensor. Low costs because the Nederland's have one and tested witch we can use.</p> <p>Option: use a panel with the flag of each country and a push button. When you push the button the country lights up.</p>
