| Meeting Description | Second Project Meeting in Lisbon (Portugal) |
| Meeting hosted by | CENFIM |

| | |
|----------------------------|--------------------------------------|
| Date / Time / Place | Thursday, 8 th March 2012 |
| Name of Workline | Workline C – European Electronic Map |
| Name of Workgroup | Work Group I |

| | |
|---|-------------------------------|
| Representative workgroup member | [AT STP] Michael Fahrafellner |
| Co-representative workgroup member | [IR] Colin O’neill |
| Co-representative workgroup member | [CH] Christian Trinkler |

| | |
|----------------------------------|----------------------------|
| Further workgroup members | [IS], [RO], [CH] |
| | [AT STP], [IR], [LT], [SI] |
| | |

| | |
|--------------------------|-----------------|
| Minute written by | [S] Sašo Goubar |
|--------------------------|-----------------|

| Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance | Responsible school(s) or person(s) incl. deadlines |
|--|---|
| <p>We were talking about the shape of the map. We were choosing between puzzles and European map. We chose the puzzles. It will be 24 puzzles (countries) positioned around the screen, assembled together and in the middle, on the screen, we will have PowerPoint presentation. For every country, in each PowerPoint there will be some information, pictures and music that will represent current country. For every PowerPoint slide there will be LED lights glowing around of the shape of the country that will be milled and drilled for the LED lights in the puzzle, so the country shape will be highlighted. The parts (puzzles) will be milled out of prox. 10mm thick plate of aluminium. Then we will mill and drill holes for the LED lights in the shape of the country. After that we will insert and wire LED lights into the holes.</p> | [AT STP] |

| We reviewed yesterday’s ideas and we decided not to have LED light around the country (in the shape of country) but just the main city and school city. Today’s main problem was how to communicate with countries and wagons. We decided to take the microchip and program to light them both at the same time. | [AT STP] |
