Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance	Responsible school(s) or person(s) incl. deadlines
<p>Every country should do some homework for this meeting in the train project.</p> <ul style="list-style-type: none"> The Netherlands and Sweden tried to show what they made. Unfortunately it didn't work. Probably because of the airport scanners reseted the microchips [SE+NL]. Iceland would look up into create a plastic cover for the locomotive. In the shape of the TGV-train. Unfortunately, Aðalsteinn Ómarsson didn't communicated this with his colleagues from Romania, or in his school. Romania tried to get in contact, but they didn't get any response [IS+RO]. Poland and Switzerland would make technical drawings of the undercarriage of the locomotive. They have done their work proper! [PO+CH] <p>We have decided that we should have some hardware in Finland, so we can show people what our ideas are, and we can create a better view/idea of our own plans.</p> <p>The roles are:</p> <ul style="list-style-type: none"> NL- Boogie's, with axels and DC-motor/transmission. And the electronic equipment for the engine. CH-boogie's at the front. PO- upper part. RO- wheels producing. NL+CH- technical drawings. <p>If we have questions, we use mail, the forum and if possible Skype.</p>
